Some maths revision

## 1 Why is my evil lecturer forcing me to learn statistics?

- 1.1. What will this chapter tell me? ®
- 1.2. What the hell am I doing here? I don't belong here ©
  - 1.2.1. The research process ©
- 1.3. Initial observation: finding something that needs explaining ©
- 1.4. Generating theories and testing them ©
- 1.5. Collect data to test your theory ©
  - 1.5.1. Variables©
  - 1.5.2. Measurement error ©
  - 1.5.3. Validity and reliability ©
  - 1.5.4. Correlational research methods ©
  - 1.5.5. Experimental research methods ©
  - 1.5.6. Randomization ©
- 1.6. Analysing data ©
  - 1.6.1. Frequency distributions ©
  - 1.6.2. The centre of a distribution ©
  - 1.6.3. The dispersion in a distribution ©
  - 1.6.4. Using a frequency distribution to go beyond the data ©
  - 1.6.5. Fitting statistical models to the data ©
- 1.7. Reporting data ©
  - 1.7.1. Dissemination of research ©
  - 1.7.2. Knowing how to report data ©
  - 1.7.3. Some initial guiding principles ©
- 1.8. Brian's attempt to woo Jane ©
- 1.9. What next? ©
- 1.10. Key terms that I've discovered
- 1.11. Smart Alex's tasks
- 1.12. Further reading

<b>Everything you never wanted to know about statistics</b>	<b>40</b>
2.1. What will this chapter tell me? ©	40
2.2. Building statistical models ©	41
2.3. Populations and samples ©	42
2.4. Statistical models ©	44
2.4.1 The mean as a statistical model ©	46
2.4.2. Assessing the fit of a model: sums of squares and variance revisited ©	46
2.4.3 Estimating parameters ©	50
2.5. Going beyond the data ©	51
2.5.1. The standard error ©	52
2.5.2. Confidence intervals ©	54
2.6. Using statistical models to test research questions ©	60
2.6.1 Null hypothesis significance testing ©	60
2.6.2. Problems with NHST ©	74
2.7. Modern approaches to theory testing ©	78
2.7.1. Effect sizes ©	79
2.7.2. Meta-analysis ©	83
2.8. Reporting statistical models ©	84
2.9. Brian's attempt to woo Jane ©	85
2.10. What next? ©	86
2.11. Key terms that I've discovered	87
2.12. Smart Alex's tasks	87
2.13. Further reading	88
<b>The IBM SPSS Statistics environment</b>	<b>89</b>
3.1. What will this chapter tell me? ©	89
3.2. Versions of IBM SPSS Statistics ©	90
3.3. Windows versus MacOS ©	90
3.4. Getting started ©	90
3.5. The data editor ©	91
3.5.1 Entering data into the data editor ©	98
3.5.2. The variable view ©	99
3.5.3 Missing values ©	107
3.6. Importing data ©	109
3.7. The SPSS viewer ©	109
3.8. Exporting SPSS output ©	113
3.9. The syntax editor ©	113
3.10. Saving files ©	115
3.11 Retrieving a file ©	115
3.12 Brian's attempt to woo Jane ©	116
3.13. What next? ©	117
3.14 Key terms that I've discovered	117
3.15. Smart Alex's tasks	117
3.16 Further reading	120
<b>Exploring data with graphs</b>	<b>121</b>
4.1. What will this chapter tell me? ©	121
4.2. The art of presenting data ©	122
4.2.1. What makes a good graph? ©	122
4.2.2 Lies, damned lies, and ... erm ... graphs ©	123

4.3.	The SPSS chart builder ©	125
4.4.	Histograms©	127
4.5.	Boxplots (box-whisker diagrams) ©	131
4.6.	Graphing means: bar charts and error bars ©	135
4.6.1.	Simple bar charts for independent means ©	136
4.6.2.	Clustered bar charts for independent means ©	137
4.6.3.	Simple bar charts for related means©	140
4.6.4.	Clustered bar charts for related means ©	143
4.6.5.	Clustered bar charts for'mixed'designs ©	145
4.7.	Line charts©	148
4.8.	Graphing relationships: the scatterplot ©	148
4.8.1.	Simple scatterplot ©	149
4.8.2.	Grouped scatterplot ©	151
4.8.3.	Simple and grouped 3-D scatterplots ©	153
4.8.4.	Matrix scatterplot ©	154
4.8.5.	Simple dot plot or density plot ©	157
4.8.6.	Drop-line graph ©	157
4.9.	Editing graphs ©	158
4.10.	Brian's attempt to woo Jane ©	161
4.11.	What next?©	161
4.12.	Key terms that I've discovered	161
4.13.	Smart Alex's tasks	162
4.14.	Further reading	162
<b>5</b>	<b>The beast of bias</b>	<b>163</b>
5.1.	What will this chapter tell me? ©	163
5.2.	What is bias?©	164
5.2.1.	Assumptions©	165
5.2.2.	Outliers©	165
5.2.3.	Additivity and linearity ©	167
5.2.4.	Normally distributed something or other ©	168
5.2.5.	Homoscedasticity/homogeneity of variance ©	172
5.2.6.	Independence ©	176
5.3.	Spotting bias ©	176
5.3.1.	Spotting outliers ©	176
5.3.2.	Spotting normality ©	179
5.3.3.	Spotting linearity and heteroscedasticity/heterogeneity of variance©	192
5.4.	Reducing bias ©	196
5.4.1.	Trimming the data ©	196
5.4.2.	Winsorizing©	198
5.4.3.	Robust methods ®	198
5.4.4.	Transforming data ©	201
5.5.	Brian's attempt to woo Jane ©	210
5.6.	What next?©	210
5.7.	Key terms that I've discovered	211
5.8.	Smart Alex's tasks	211
5.9.	Further reading	212
<b>6</b>	<b>Non-parametric models</b>	<b>213</b>
6.1.	What will this chapter tell me? ©	213
6.2.	When to use non-parametric tests ©	214

6.3.	General procedure of non-parametric tests in SPSS ©	215
6.4.	Comparing two independent conditions: the Wilcoxon rank-sum test and Mann-Whitney test ©	217
6.4.1.	Theory©	219
6.4.2.	Inputting data and provisional analysis ©	221
6.4.3.	The Mann-Whitney test using SPSS ©	223
6.4.4.	Output from the Mann-Whitney test ©	224
6.4.5.	Calculating an effect size ©	227
6.4.6.	Writing the results ©	227
6.5.	Comparing two related conditions: the Wilcoxon signed-rank test ©	228
6.5.1.	Theory of the Wilcoxon signed-rank test ©	228
6.5.2.	Running the analysis ©	230
6.5.3.	Output for the ecstasy group ©	231
6.5.4.	Output for the alcohol group ©	233
6.5.5.	Calculating an effect size ©	234
6.5.6.	Writing the results ©	234
6.6.	Differences between several independent groups: the Kruskal-Wallis test ©	236
6.6.1.	Theory of the Kruskal-Wallis test ©	236
6.6.2.	Follow-up analysis ©	238
6.6.3.	Inputting data and provisional analysis ©	239
6.6.4.	Doing the Kruskal-Wallis test in SPSS ©	241
6.6.5.	Output from the Kruskal-Wallis test ©	242
6.6.6.	Testing for trends: the Jonckheere-Terpstra test ©	246
6.6.7.	Calculating an effect size ©	248
6.6.8.	Writing and interpreting the results ©	249
6.7.	Differences between several related groups: Friedman's ANOVA ©	249
6.7.1.	Theory of Friedman's ANOVA ©	251
6.7.2.	Inputting data and provisional analysis ©	252
6.7.3.	Doing Friedman's ANOVA in SPSS ©	253
6.7.4.	Output from Friedman's ANOVA ©	254
6.7.5.	Following-up Friedman's ANOVA ©	256
6.7.6.	Calculating an effect size ©	256
6.7.7.	Writing and interpreting the results ©	257
6.8.	Brian's attempt to woo Jane ©	258
6.9.	What next? ©	259
6.10.	Key terms that I've discovered	259
6.11.	Smart Alex's tasks	259
6.12.	Further reading	261
<b>7</b>	<b>Correlation</b>	<b>262</b>
7.1.	What will this chapter tell me? ©	262
7.2.	Modelling relationships ©	263
7.2.1.	A detour into the murky world of covariance ©	264
7.2.2.	Standardization and the correlation coefficient ©	266
7.2.3.	The significance of the correlation coefficient (D	268
7.2.4.	Confidence intervals for $r$ ©	269
7.2.5.	A word of warning about interpretation: causality ©	270
7.3.	Data entry for correlation analysis using SPSS ©	270
7.4.	Bivariate correlation ©	271
7.4.1.	General procedure for running correlations in SPSS ©	272
7.4.2.	Pearson's correlation coefficient ©	274
7.4.3.	Spearman's correlation coefficient ©	276

7.4.4.	Kendall's tau (non-parametric) ©	278
7.4.5.	Biserial and point-biserial correlations ®	279
7.5.	Partial correlation ©	281
7.5.1	The theory behind part and partial correlation ®	281
7.5.2.	Partial correlation in SPSS ®	283
7.5.3.	Semi-partial (or part) correlations ©	285
7.6.	Comparing correlations @	285
7.6.1.	Comparing independent $r$ s ®	285
7.6.2.	Comparing dependent $r$ s ®	286
7.7.	Calculating the effect size ©	287
7.8.	How to report correlation coefficients ©	288
7.9.	Brian's attempt to woo Jane ©	290
7.10.	What next? ©	290
7.11.	Key terms that I've discovered	291
7.12.	Smart Alex's tasks	291
7.13.	Further reading	292
<b>8</b>	<b>Regression</b>	<b>293</b>
8.1.	What will this chapter tell me? ©	293
8.2.	An introduction to regression ©	294
8.2.1.	The simple linear model ©	294
8.2.2.	The linear model with several predictors ©	296
8.2.3.	Estimating the model ©	298
8.2.4.	Assessing the goodness of fit, sums of squares, $R$ and $R^2$ ©	300
8.2.5.	Assessing individual predictors ©	303
8.3.	Bias in regression models? ©	304
8.3.1.	Is the model biased by unusual cases? ©	304
8.3.2.	Generalizing the model ©	309
8.3.3.	Sample size in regression ®	313
8.4.	Regression using SPSS: One Predictor ©	314
8.4.1.	Regression: the general procedure ©	315
8.4.2.	Running a simple regression using SPSS ©	316
8.4.3.	Interpreting a simple regression ©	318
8.4.4.	Using the model ©	320
8.5.	Multiple regression ©	321
8.5.1.	Methods of regression ©	321
8.5.2.	Comparing models ©	324
8.5.3.	Multicollinearity ©	324
8.6.	Regression with several predictors using SPSS ©	326
8.6.1.	Main options ©	327
8.6.2.	Statistics ©	328
8.6.3.	Regression plots ©	329
8.6.4.	Saving regression diagnostics ©	331
8.6.5.	Further options ©	332
8.6.6.	Robust regression ©	333
8.7.	Interpreting multiple regression ©	334
8.7.1	Descriptives ©	334
8.7.2.	Summary of model ©	335
8.7.3.	Model parameters ©	338
8.7.4.	Excluded variables ©	342
8.7.5.	Assessing multicollinearity ©	342
8.7.6	Bias in the model: casewise diagnostics ©	345
8.7.7.	Bias in the model: assumptions ©	348

8.8.	What if I violate an assumption? Robust regression ©	350
8.9.	How to report multiple regression ©	352
8.10.	Brian's attempt to woo Jane ©	353
8.11.	What next? ©	354
8.12.	Key terms that I've discovered	354
8.13.	Smart Alex's tasks	354
8.14.	Further reading	356
<b>9</b>	<b>Comparing two means</b>	<b>357</b>
9.1.	What will this chapter tell me? ©	357
9.2.	Looking at differences ©	358
9.2.1.	An example: are invisible people mischievous? ©	359
9.2.2.	Categorical predictors in the linear model ©	362
9.3.	The Mest ©	364
9.3.1.	Rationale for the Mest ©	364
9.3.2.	The independent f-test equation explained ©	365
9.3.3.	The paired-samples Mest equation explained ©	368
9.4.	Assumptions of the/-test ©	371
9.5.	The independent Ntest using SPSS ©	371
9.5.1.	The general procedure ©	371
9.5.2.	Exploring data and testing assumptions ©	372
9.5.3.	Compute the independent Mest ©	372
9.5.4.	Output from the independent Mest ©	373
9.5.5.	Calculating the effect size ©	376
9.5.6.	Reporting the independent Mest ©	377
9.6.	Paired-samples Mest using SPSS ©	378
9.6.1.	Entering data ©	378
9.6.2.	Exploring data and testing assumptions ©	378
9.6.3.	Computing the paired-samples Mest ©	383
9.6.4.	Calculating the effect size ©	386
9.6.5.	Reporting the paired-samples Mest ©	387
9.7.	Between groups or repeated measures? ©	388
9.8.	What if I violate the test assumptions? ©	388
9.9.	Brian's attempt to woo Jane ©	389
9.10.	What next? ©	389
9.11.	Key terms that I've discovered	389
9.12.	Smart Alex's tasks	390
9.13.	Further reading	391
<b>10</b>	<b>Moderation, mediation and more regression</b>	<b>392</b>
10.1.	What will this chapter tell me? ©	392
10.2.	Installing custom dialog boxes in SPSS ©	393
10.3.	Moderation: interactions in regression @	395
10.3.1.	The conceptual model ©	395
10.3.2.	The statistical model ©	397
10.3.3.	Centring variables ©	398
10.3.4.	Creating interaction variables ©	400
10.3.5.	Following up an interaction effect ©	400
10.3.6.	Running the analysis ©	401
10.3.7.	Output from moderation analysis ©	402
10.3.8.	Reporting moderation analysis ©	407
10.4.	Mediation ©	408

10.4.1. The conceptual model ©	408
10.4.2. The statistical model ©	409
10.4.3. Effect sizes of mediation ®	411
10.4.4. Running the analysis ©	413
10.4.5. Output from mediation analysis ©	414
10.4.6. Reporting mediation analysis ©	418
10.5. Categorical predictors in regression ©	419
10.5.1. Dummy coding®	419
10.5.2. SPSS output for dummy variables ®	422
10.6. Brian's attempt to woo Jane ©	426
10.7. What next?©	427
10.8. Key terms that I've discovered	427
10.9. Smart Alex's tasks	427
10.10. Further reading	428
<b>11 Comparing several means: ANOVA (GLM 1)</b>	<b>429</b>
11.1. What will this chapter tell me? ©	429
11.2. The theory behind ANOVA ©	430
11.2.1. Using a linear model to compare means ©	430
11.2.2. Logic of the F-ratio ©	434
11.2.3. Total sum of squares ( $SS_T$ ) ©	436
11.2.4. Model sum of squares ( $SS_M$ ) ©	438
11.2.5. Residual sum of squares( $SS_H$ ) ©	439
11.2.6. Mean squares ©	440
11.2.7. The F-ratio®	441
11.2.8. Interpreting $F$ ©	442
11.3. Assumptions of ANOVA ©	442
11.3.1. Homogeneity of variance ©	442
11.3.2. Is ANOVA robust? ®	444
11.3.3. What to do when assumptions are violated ©	445
11.4. Planned contrasts ©	445
11.4.1. Choosing which contrasts to do ©	446
11.4.2. Defining contrasts using weights ©	449
11.4.3. Non-orthogonal comparisons ©	454
11.4.4. Standard contrasts ©	456
11.4.5. Polynomial contrasts: trend analysis ©	457
11.5. <i>Post hoc</i> procedures ©	458
11.5.1. Type I and Type II error rates for <i>post hoc</i> tests ©	458
11.5.2. Are <i>post hoc</i> procedures robust? ©	459
11.5.3. Summary of <i>post hoc</i> procedures ©	459
11.6. Running one-way ANOVA in SPSS ©	460
11.6.1. General procedure of one-way ANOVA ©	460
11.6.2. Planned comparisons using SPSS ©	462
11.6.3. <i>Post hoc</i> tests in SPSS ©	463
11.6.4. Options ©	464
11.6.5. Bootstrapping ©	465
11.7. Output from one-way ANOVA ©	466
11.7.1. Output for the main analysis ©	466
11.7.2. Output for planned comparisons ©	469
11.7.3. Output for <i>post hoc</i> tests ©	470
11.8. Calculating the effect size ©	472
11.9. Reporting results from one-way independent ANOVA ©	474
11.10. Key terms that I've discovered	475

11.11	Brian's attempt to woo Jane ©	475
11.12	What next? ©	476
11.13	Smart Alex's tasks	476
11.14	Further reading	477
<b>12</b>	<b>Analysis of covariance, ANCOVA (GLM 2)</b>	<b>478</b>
12.1.	What will this chapter tell me? ©	478
12.2.	What is ANCOVA? ©	479
12.3.	Assumptions and issues in ANCOVA ©	484
12.3.1.	Independence of the covariate and treatment effect ®	484
12.3.2.	Homogeneity of regression slopes ®	485
12.3.3.	What to do when assumptions are violated ©	488
12.4.	Conducting ANCOVA in SPSS ©	488
12.4.1.	General procedure ©	488
12.4.2.	Inputting data ©	488
12.4.3.	Testing the independence of the treatment variable and covariate ©	488
12.4.4.	The main analysis ©	490
12.4.5.	Contrasts	490
12.4.6.	Other options ©	491
12.4.7.	Bootstrapping and plots ©	493
12.5.	Interpreting the output from ANCOVA ©	493
12.5.1.	What happens when the covariate is excluded? ©	493
12.5.2.	The main analysis ©	494
12.5.3.	Contrasts ©	497
12.5.4.	Interpreting the covariate ©	497
12.6.	Testing the assumption of homogeneity of regression slopes ©	499
12.7.	Calculating the effect size ©	500
12.8.	Reporting results ©	503
12.9.	Brian's attempt to woo Jane ©	504
12.10.	What next?©	504
12.11.	Key terms that I've discovered	505
12.12.	Smart Alex's tasks	505
12.13.	Further reading	506
<b>13</b>	<b>Factorial ANOVA (GLM 3)</b>	<b>507</b>
13.1.	What will this chapter tell me? ©	507
13.2.	Theory of factorial ANOVA (independent designs) ©	508
13.2.1.	Factorial designs ©	508
13.2.2.	Guess what? Factorial ANOVA is a linear model ©	509
13.2.3.	Two-way ANOVA: behind the scenes ©	514
13.2.4.	Total sums of squares ( $SS_T$ ) ©	515
13.2.5.	Model sum of squares, $SS_M$ ©	516
13.2.6.	The residual sum of squares, $SS_R$ ©	519
13.2.7.	The F-ratios ©	519
13.3.	Assumptions of factorial ANOVA ©	520
13.4.	Factorial ANOVA using SPSS ©	520
13.4.1.	General procedure for factorial ANOVA ©	520
13.4.2.	Entering the data and accessing the main dialog box ©	521
13.4.3.	Graphing interactions ©	522
13.4.4.	Contrasts ©	523
13.4.5.	<i>Post hoc</i> tests ©	524
13.4.6.	Bootstrapping and other options ©	524

13.5. Output from factorial ANOVA ©	526
13.5.1. Levene's test ©	526
13.5.2. The main ANOVA table ©	526
13.5.3. Contrasts©	529
13.5.4. Simple effects analysis ®	530
13.5.5. <i>Post hoc</i> analysis ©	532
13.6. Interpreting interaction graphs ©	533
13.7. Calculating effect sizes ©	537
13.8. Reporting the results of two-way ANOVA ©	539
13.9. Brian's attempt to woo Jane ©	540
13.10. What next? ©	541
13.11. Key terms that I've discovered	541
13.12. Smart Alex's tasks	541
13.13. Further reading	542
<b>14 Repeated-measures designs (GLM 4)</b>	<b>543</b>
14.1. What will this chapter tell me? ©	543
14.2. Introduction to repeated-measures designs ©	544
14.2.1. The assumption of sphericity ©	545
14.2.2. How is sphericity measured? ©	545
14.2.3. Assessing the severity of departures from sphericity ©	546
14.2.4. What is the effect of violating the assumption of sphericity? ©	546
14.2.5. What do you do if you violate sphericity? ©	548
14.3. Theory of one-way repeated-measures ANOVA ©	548
14.3.1. The total sum of squares, $SS_T$ ©	551
14.3.2. The within-participant sum of squares, $SS_W$ ©	551
14.3.3. The model sum of squares, $SS_M$ ©	552
14.3.4. The residual sum of squares, $SS_R$ ©	553
14.3.5. The mean squares ©	553
14.3.6. The F-ratio©	554
14.3.7. The between-participants sum of squares ©	554
14.4. Assumptions in repeated-measures ANOVA ©	555
14.5. One-way repeated-measures ANOVA using SPSS ©	555
14.5.1. Repeated-measures ANOVA: the general procedure 2)	555
14.5.2. The main analysis ©	555
14.5.3. Defining contrasts for repeated measures ©	557
14.5.4. <i>Post hoc</i> tests and additional options ©	558
14.6. Output for one-way repeated-measures ANOVA ©	559
14.6.1. Descriptives and other diagnostics ©	559
14.6.2. Assessing and correcting for sphericity: Mauchly's test ©	560
14.6.3. The main ANOVA ©	560
14.6.4. Contrasts®	563
14.6.5. <i>Post hoc</i> tests ©	565
